## SEALCOATING

Thank you for your interest in **SIDELINE Asphalt Sealing** services.

SEALCOATING protects your asphalt from damaging elements such as rain, ice, snow, and chemicals which, over time, cause your asphalt to become brittle and crack. A driveway or parking lot's lifespan is increased when sealcoating is done on a regular basis.

When you call **SIDELINE**, we will evaluate your asphalt, apply the necessary sealer, fill in your cracks, and repair any potholes that have developed.

### **How Often Should You Sealcoat Your Driveway?**

How often sealcoating needs to be done depends mostly on your climate and how much traffic takes place on your driveway and walkways. Most have it done every two or three years. If your asphalt becomes gray and weathered looking or starts to get small, hairline cracks, your asphalt is telling you it's time to be protected with a fresh coat of sealer.

### **Advantages of Sealcoating Your Driveway or Parking Lot**

There are several advantages to sealcoating on a regular basis:

- Protects and Prolongs the Life of Your Asphalt
- Regular Sealcoating can Save You Money in the Long Run
- Enhances the Appearance of Your Asphalt
- Protects Against Water Penetration from Rain, Frost, & Snow

### **Is Your Asphalt Calling Out for A New Coat, A Fresh Look?**
